July 2014

ELEMENTARY SCHOOLS

The progress of the summer 2014 elementary renovations has remained on schedule and within budget. The largest improvements have been at Erie Elementary where phase one of renovations has started to close, opening up the work for phase two to begin. Phase one involves the creation of two new Kindergarten classrooms from a portion of the existing cafeteria. Phase two includes opening the school's stage into its adjacent multipurpose room. New fire alarms and front entrances at a few of the district's elementary schools have also taken place. Cherokee, Ojibwa, Shawnee and Ottawa's main offices have also been reconfigured for more inviting entryways. Another important improvement has been at Huron Elementary, where the previous accordion walls between several Kindergarten rooms have been replaced by a permanent, noise-reducing wall. Electrical work has been underway at many of the sites, including the Administration Building's heating units. Below lists the specific work that has been completed at each of the sites:

Cherokee Elementary:

- Reconfigured/improved main office and staff lounge
- Reworked exterior linear metal ceiling system at entrances
- Replaced select ceilings at alcoves and media center
- Replaced toilet flush valves throughout building
- Replaced paving along the parent drop-off lane

Cheyenne Elementary:

- Replaced multi-purpose room carpet
- Replaced science room platform flooring

Clinton Valley Elementary:

- Upgraded fire alarm system

Erie Elementary:

- Created new front entrance feature and replace lobby ceiling/lights

Fox Elementary:

- Replaced lobby ceiling and lights
- Replaced classroom faucets and building back-flow preventer
- Upgraded fire alarm system

Huron Elementary:

- Reconstructed exterior masonry walls
- Replaced 2 accordion walls with a permanent wall in kindergarten rooms
- Upgraded fire alarm system

Miami Elementary:

- Replaced 2 hot water heaters and back-flow preventer

Mohawk Elementary:

- Created new front entrance feature and replace lobby ceiling/lights
- Replaced classroom faucets
- Replaced select toilets, urinals and sinks
- Upgraded fire alarm system

Ojibwa Elementary:

- Reconfigured/improved main office
- Added metal enclosure at front entry columns and above doors
- Added corridor security doors
- Replaced 3 main boilers and back-flow preventer
- Upgraded fire alarm system

Ottawa Elementary:

- Upgraded fire alarm system

Shawnee Elementary:

- Replaced front office and multi-purpose room carpet
- Upgraded fire alarm system

Administration Building:

- Replace 2 rooftop heating units

HIGH SCHOOLS

Dakota High School:

The new running track's asphalt has been laid with the final layers and finishes being made in mid August. The school's synthetic turf has been installed, with the details and center field logo currently being placed. All work is on schedule to be completed come the start of school in the Fall.
